DETAILED ACTION

Claims 1-11 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest if the condition is not satisfied, decreasing an interval of an item belonging to a group linked to the compared item and increasing an interval of at least one item not belonging to said group, as recited in independent claim 1.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest if the condition is not satisfied, decreasing an interval of each item linked to the compared item and if the item value of an item associated with a computer load is different from the condition stored in the storage device, decreasing an interval of at least one of the plurality of items associated with the program execution state and having an interval not smaller than an initial value linked to the item, as recited in independent claim 4.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically,

the prior art of record fails to teach or suggest when the condition is not satisfied and an item value of an item associated with a computer load satisfies the condition, decreasing the interval of each of the plurality of items linked to the compared item, as recited in independent claim 6.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest when the condition is not satisfied and the number of items related to the compared item is equal to or smaller than a predetermined value, decreasing the interval of the respective items related to the compared item, as recited in independent claim 9.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest when on of the at least one of the plurality of item values does not satisfy a condition related to a respective first item and when a second group related to a second item different from the first item, changing the intervals and decreasing the interval of each of the items belonging to the group related to the first item, as recited in independent claim 10.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest if the item value does not satisfy the condition, extracting a second item related to the first item and at least one of a plurality of items not related to the first item, modifying an interval related to the extracted second item related to the first item to an interval smaller than the interval stored ... and modifying an interval related to the extracted second item not related to the first item to an interval greater than the interval stored ..., as recited in independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
